

Jenkins – Integration with Git Server

First Repo on Server

- Create a Repo on the Server – “EchoHello”
- Put in Hello.bat that prints “Hello World”
- Identify the HTTPS URL of this Repo

Jenkins + Git Integration

- Git Client plugin (installed by default)
- Check if path to Git is correct
- Set up a FreeStyle Job to connect to GitHub using HTTPS URL, pull code and run it

Jenkins + Git Server Integration

- Specify Git Server Credentials (HTTPS)

Jenkins Credentials Provider: Jenkins
